PROFESSIONAL SUMMARY

Data Analyst with 3+ years of hands-on experience in data analysis, dashboard development, SQL querying, and ETL pipeline design. Skilled in Python (Pandas, NumPy), Power BI, PostgreSQL/SQL, Advanced Excel, and DAX for turning raw data into actionable business insights. Proven ability to build interactive dashboards, automate reporting workflows, and improve data accuracy — reduced reporting cycle time by 40% and achieved 100% data accuracy across reporting outputs. Strong foundation in data cleaning, data modeling, statistical analysis, and data visualization, with a track record of independent analytics projects including a 100K+ record SQL/Python/Power BI portfolio. Seeking an entry-level Data Analyst role to apply strong analytical, technical, and problem-solving skills to a data-driven team.

CORE TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy, Data Cleaning, EDA), SQL, PostgreSQL, DAX, M (Power Query), VBA

Data Visualization & BI Tools: Power BI (Drill-downs, Slicers, KPI Cards, DAX Measures), Tableau (Basic), Excel Charts, Dashboard Design

Data Analysis & ETL: Data Cleaning, Data Validation, Data Transformation, Data Modeling, ETL Pipeline Development, Exploratory Data Analysis (EDA)

Spreadsheet Analytics: Advanced Excel — Power Query, Pivot Tables, VLOOKUP, INDEX-MATCH, Dynamic Arrays, Power Pivot, Data Validation

Databases: PostgreSQL, SQL (Joins, Aggregations, Subqueries, Window Functions)

Reporting & Analytics: KPI Dashboards, Trend Analysis, Statistical Reporting, Automated Reporting Systems, Data-Driven Decision Support

Tools & Platforms: Power BI, MS Excel, PostgreSQL, Python (Jupyter), Git/GitHub, MS Office Suite, Google Sheets

Core Competencies: Analytical Problem Solving, Data Storytelling, Attention to Detail, Stakeholder Communication, Process Automation

PROFESSIONAL EXPERIENCE

Data Analyst

March 2023 – Present

Vastu Vihar Real Estate Company

Bodhgaya, Bihar

- Data Visualization & Dashboard Development:** Designed and maintained interactive Power BI dashboards — with drill-downs, slicers, KPI cards, and DAX measures — analyzing trends across 5+ data sets; used weekly for data-driven decision-making.
- Reporting Automation:** Built an automated data reporting system using Python and VBA-driven Excel workflows for recurring monthly reports — cut manual reporting effort by ~40% (8+ hours saved per month).
- SQL & ETL Pipeline Development:** Authored PostgreSQL/SQL queries, joins, and aggregations, and built ETL workflows to extract, transform, and load raw data for structured, analysis-ready reporting.
- Data Cleaning & Quality Assurance:** Performed end-to-end data cleaning, transformation, and validation on large raw datasets prior to dashboard ingestion — achieved 100% data accuracy across all reporting outputs.
- Exploratory Data Analysis:** Conducted trend and pattern analysis using Excel and Power BI to identify seasonal patterns and operational bottlenecks — insights directly improved planning and forecasting decisions.
- Data Storytelling & Reporting:** Translated complex datasets into clear visual dashboards and summary reports for stakeholders, supporting data-backed decisions.
- Cross-functional Collaboration:** Partnered with cross-functional teams to gather requirements, standardize data definitions, and build consistent, reusable reporting frameworks.

KEY DATA ANALYTICS PROJECTS

OLA Bookings Data Analysis Portfolio | SQL, Python, Power BI

- Analyzed 100,000+ ride-booking records using SQL queries and Python (Pandas) for exploratory data analysis, covering vehicle performance, cancellation patterns, revenue trends, and customer ratings.

- Built an interactive Power BI dashboard to visualize booking trends and KPIs; created a companion portfolio of 50+ SQL and Python practice Q&A sets.
- GitHub: github.com/prashantk1452-source/Prashant-
- Customer Shopping Behavior Analysis Portfolio | Python + SQL + Power BI**
- Performed end-to-end EDA in Python: cleaned a 3,900-row retail purchase dataset, imputed missing values, and engineered features (age groups, purchase frequency).
- Ran 10 business analytics SQL queries using CTEs, window functions (ROW_NUMBER), and subqueries to segment customers (New/Returning/Loyal) and analyze revenue drivers.
- Built an interactive Power BI dashboard and presentation highlighting revenue-by-gender, category performance, and subscription impact for stakeholders.
- GitHub: github.com/prashantk1452-source/Prashant-

Multi-Source Data Dashboard | Power BI, Advanced Excel, DAX

- Consolidated data from 5+ sources into a single interactive Power BI dashboard with drill-downs, slicers, and time-series visualizations.
 - Reduced data aggregation time from 2 days to under 2 hours by building automated ETL refresh pipelines.
- KPI Tracking Dashboard | Excel, Power Query, SQL**
- Built a stage-wise data tracker with automated alerts, conversion-rate formulas, and monthly KPI charts using Power Query and dynamic Excel arrays.
 - Enabled real-time monitoring of key metrics without manual intervention, significantly reducing missed follow-ups.

Data Pipeline & BI Reporting | Power BI, PostgreSQL, ETL

- Developed an interactive BI dashboard with drill-down analysis by category, entity, and time period for trend forecasting.
- Integrated PostgreSQL-sourced data through ETL transformations, ensuring clean, queryable datasets feeding real-time Power BI visuals.

EDUCATION

Bachelor of Commerce (B.Com)	2019
<i>Tilka Manjhi Bhagalpur University, Bhagalpur, Bihar</i>
